## ABETZ, Peter

As a currently serving councillor I believe I can continue to make a significant contribution to Council. I know the local issues. I have worked constructively with my fellow councillors to get things done.

My experience as a former state MP and as a pastor for 25 years has proved invaluable in fulfilling my role. My passion is achieving positive outcomes for individuals and the wider community.

I will continue to make myself available to meet with people and community groups outside of office hours.

As a qualified agricultural scientist, I understand environmental issues and want to see the land adjoining our rivers developed into beautiful passive recreation areas.

My wife and I have 5 married adult children and 11 grandchildren, so we understand the pressures that families experience.
