Making the City of Gosnell's a great place

We will celebrate our vibrant and diverse community, embrace our natural surroundings and drive the development of opportunities, to support a safe and sustainable City for future generations.

Integrated Planning and Reporting Framework

The Corporate Business Plan is part of the Integrated Planning and Reporting framework which applies to all local governments to ensure that they plan for the future and that these plans take account of community aspirations.

This diagram shows the key elements of the Integrated Planning and Reporting Framework.

Strategic Direction

The 10 Year Strategic Community Plan represents the highest level planning document for the City of Gosnells. The Strategic Community Plan underwent a major review in 2023 and was updated in response to feedback from a survey of the community.

The survey participants were asked to score how important each strategic goal is and how well the City is delivering on that goal. The average score for each goal is shown in the introduction to each strategic priority in this document.

Where the average response is that the participant agrees the goal is important to them and the City is delivering on the goal, the results will display in the top right quadrant of the chart. This demonstrates a positive response.

Strategic Priorities

The 10 Year Strategic Community Plan establishes the following five strategic priorities:

1. ENVIRONMENT – The environment is protected and enhanced
2. SAFETY – Public health and safety risks are managed and people feel safe
3. COMMUNITY – The community is proud and harmonious
4. PLACES – Places within the City are attractive and vibrant
5. ECONOMY – Businesses are supported and the economy is growing.

The Corporate Business Plan activates the commitments made in the Strategic Community Plan by ensuring that community aspirations and priorities are translated into actions that are delivered. The tables on the following pages provide details of these actions, including who has lead responsibility for the activity and when it will occur.

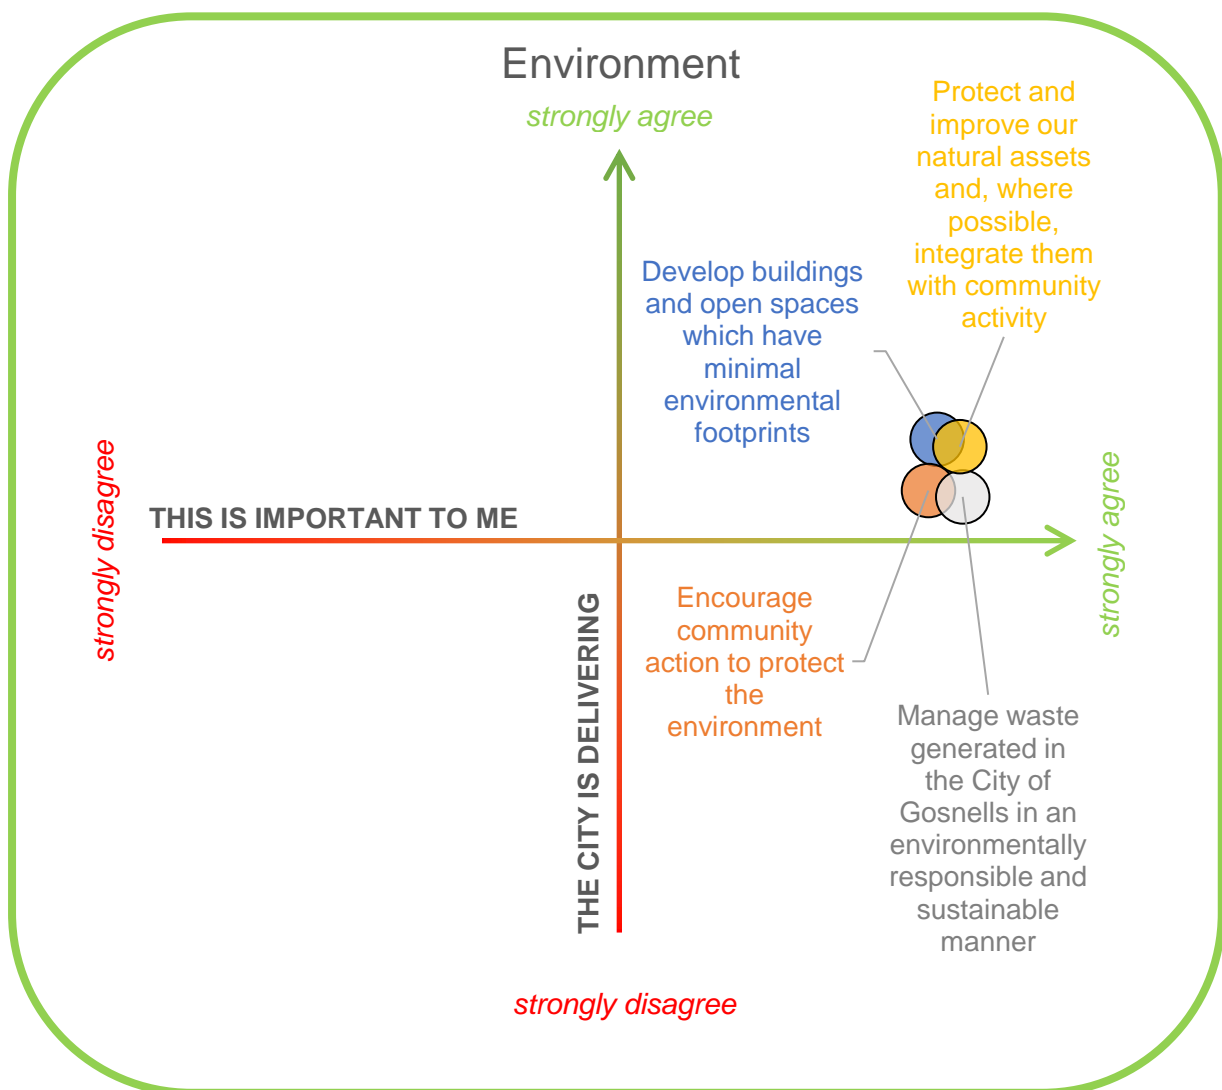

Strategic Priority 1: Environment – The environment is protected and enhanced.

Based on feedback from the Strategic Community Plan survey, the strategic priority Environment is the number one priority for the community. The Environment strategic priority include four goals which are identified in the following chart and tables. The survey highlighted that a clear majority of the community feel positively about the City’s delivery of the goals “Protect and improve our natural assets and, where possible, integrate them with community activity” and “Develop buildings and open spaces which have minimal environmental footprints”. However, 22 percent were of the view that the City could improve delivery of the goal “Encourage community action to protect the environment” and over a quarter indicated that City delivery of the goal “Manage waste generated in the City in an environmentally responsible and sustainable manner” could be improved.

The City is home to a diverse landscape which includes areas of environmental significance such as Ellis Brook Valley and Mary Carroll Park.

The City will continue to protect and enhance natural areas and provide opportunities for the community to enjoy the rich natural environment.

Through community education and opportunities to recycle, the City will help to reduce the impact of waste on the environment.

Goal 1.1 Protect and improve our natural assets and where possible integrate them with community activity. Measuring and Reporting on Progress

The City is committed to rigorous self-evaluation and transparent and accessible reporting to ensure it can be held accountable in relation to delivery of the Corporate Business Plan.

Performance Monitoring

The City monitors performance in relation to a wide range of activities on a monthly basis to track progress and provides a comprehensive monthly report to elected members.

Strategic Community Plan Progress Report

The City is required to review the Strategic Community Plan every two years and a progress report is prepared and published on our website as part of this review which allows residents to see progress against specific goals.

Annual Report

At the end of each financial year the City publishes its Annual Report which provides a comprehensive update on our budget, informs residents of our key achievements over the previous 12 months and states our plans for future major projects.

Major Projects Progress Report

This report lists the City's major projects for the year. Progress reports are provided quarterly to Council and are available to the community through publication in Council minutes.

City Update

Residents can subscribe to receive electronic newsletters, such as the monthly City Update eNewsletter, which contains details of major projects, programs, events and activities which align with delivery of the City's Strategic Community Plan.

City Communications

The City uses a range of methods to communicate its activities in relation to the delivery of the Strategic Community Plan and this Corporate Business Plan. These include updates on our website at www.gosnells.wa.gov.au, our monthly *Life in the City of Gosnells* page within the local newspaper and updates via our social media channels.

Your Say Gosnells

The City has a dedicated consultation website which provides updates and information about public consultations. Members of the community are encouraged to register for regular updates.

Strategic Risks

The City has a robust risk management framework in place which raises awareness of risk across the organisation and ensures sound risk management practices are integrated into the future planning and day to day activities of the City.

The City's culture of risk awareness ensures that challenges and opportunities are systematically identified and managed appropriately.

Resourcing the Corporate Business Plan

Workforce

The majority of actions in this plan will be carried out by City of Gosnells staff. However, the City recognises that it cannot deliver the community's vision alone and will work in partnership with others where it is appropriate to do so.

The City of Gosnells Workforce Plan is the key plan which will ensure the City has the right people with the right skills to deliver this Corporate Business Plan and realise the vision of the Strategic Community Plan. The Workforce Plan will ensure that the organisation is focused on the future, adaptable to change, and that organisational capability and capacity is strengthened in key areas.

Budgeting

The costs associated with this plan have been included in the Long Term Financial Plan to ensure the City's financial sustainability.
